

UROLOGY WEEK

2018

24-28 SEPTEMBER

For public awareness of urological conditions

**Ikke ta til takke
med ubehag!**

Do you lose urine when you cough, sneeze, go for a run, or even when you're just lifting groceries? Do you have the sudden urge to go to the restroom and can't really hold it in? If you've said "yes" to either question, you might have urinary incontinence (UI). It's not easy to talk about it. But there is nothing to be embarrassed about, millions worldwide are affected by UI. Don't wait any longer. [Visit a Urologist.](#)
